L'ULTIMO CAPO

G7th's Performance 3

Capos have come a long way since the first brass press-on type of the 1700s and the elastic-banded monstrosities of our youth.

The G7th Performance 3 capo is the pinnacle of the device's evolution. Not only can it be worked with one hand, its Adaptive Radius Technology (ART) makes it great for all steel-string guitars. Its proprietary string pad conforms to any standard radii and works equally well on a '50s Telecaster with a 7.25" radius to the much-flatter/compound radius (12"-16") of a Charvel San Dimas.

The G7th clamping mechanism allows the user to control pressure applied to the strings, from very light to very heavy.

G7th offers the Performance 3 in silver, satin black, and gold as well as special editions with etched graphics. And while it isn't cheap, it'll likely be the last capo you'll buy. — *Julian Burtell*
