

The Capo Company

The future of **capos**

We never stop innovating and improving our designs

Why choose a G7th **capo**?

All G7th Capos share the following 4 attributes regardless of price:

- **Free Lifetime Warranty**

G7th has a 100% commitment to customer satisfaction. If you have a defective capo we will replace it free of charge, anywhere in the world!

- **Stay in tune**

Our capos work using the minimum tension needed to fret the strings, meaning you won't be pulled out of tune by excessive force like many others. This will also reduce the risk of accelerated fret wear caused by excessive force from poor capos.

- **Protect your neck**

No metal to wood contact between the capo and the neck of the guitar, preventing dings. Also, no marks in soft lacquer due to over-application of tension.

- **Preserves your tone**

The pad in contact with the strings is deliberately harder. This means less damping of the sound caused by fatter, softer pads, and more of the unaltered tone of the guitar.

A comprehensive range of 21st Century designed capos which offers you a one-stop shop for all your capo needs.

The Capo Company

Performance 3 capo

With **ART**

Adaptive Radius Technology (ART) • Unique tension control • Fast and precise • Stores on your peghead

Available for:

6 String electric & acoustic guitars

Silver, Black and 18kt Gold Plated

Adaptive Radius Technology

The ART system within the top bar of G7th Performance 3 capos adapts to the true curvature over your strings and fretboard, exerting completely even pressure across all the strings - setting a new standard of in-tune, buzz-free use. It gives you the maximum tuning stability with the minimum possible tension in EVERY position, on ANY guitar neck.

- Simple intuitive squeeze-on, squeeze-off action means you can move the capo from fret to fret, or from guitar to guitar without any adjustment needed: just squeeze for optimum tension.
- Almost as fast to position as a simple spring capo – faster because you don't need to retune.
- You can fine tune your guitar with the capo in place on the neck.
- Stores on the peghead or behind the nut.
- Unique patented tension control mechanism.
- Free Lifetime Warranty.

The Capo Company

Heritage capo

Traditional yoke-style capo made from hand-polished stainless steel, featuring groundbreaking G7th Adaptive Radius Technology (ART) for a perfect fit, every time.

With **ART**

Style 1 capo shown

Available in:

Standard Guitar - fits up to 1 3/4" (45mm) nut width.

Wide Guitar - fits 1 13/16" (46mm) or wider nut widths.

Also available for 12 string guitars with Compensated String Pad.

Standard Banjo - fits up to 1 7/16" (36mm) nut width

Wide Banjo - fits 1 3/8" (35mm) and wider nut widths.

- Features include a secure latching top bar, knurled tension adjustment knob, silicon neck pad and silicon side guards to protect your instrument's neck from metal to wood contact.

- Conveniently stores behind the nut when not in use, including over Martin volutes.

- ART adapts to any neck and any fret on it, constantly able to change its radius, infinitely adjusting to match YOUR instrument, for unrivalled, in-tune and buzz-free use.

- Available with a variety of engraving options.

- Free Lifetime Warranty.

Every Heritage Capo comes with **leather pouch, polishing cloth and gift box.**

Heritage capo engraving options

Style 1 (no engraving)

Style 2 (Acanthus sides engraving only)

Style 3 (Acanthus Heritage top and Acanthus sides)

The Capo Company

Performance 2 **capo** (Classical)

Iconic G7th design • Unique tension control • Fast and precise • Stores on your peghead

Available for:

Classical guitars

Silver, Black and 18kt Gold Plated

- Simple intuitive squeeze-on, squeeze-off action means you can move the capo from fret to fret, or from guitar to guitar without any adjustment needed: just squeeze for optimum tension.
- Almost as fast to position as a simple spring capo – faster because you don't need to retune.
- You can fine tune your guitar with the capo in place on the neck.
- Stores on the peghead or behind the nut.
- Unique patented tension control mechanism.
- Free Lifetime Warranty.

The Capo Company

Newport capo

Particularly suitable for awkward guitars such as 12 string guitars and those with heavy strings/high action.

Available for:

6 String guitars

Silver, Black and 18kt Gold Plated; Partial #3 and Partial #5

12 String guitars

Silver (with Compensated String Pad)

Classical guitars

Silver

Banjo guitars

Silver

- The low-profile, flip lever guitar capo; simply flip the lever to clamp and fine-tune the tension for buzz-free, tuneful capoing.

- Harder string pad gives better tone.

- No metal to wood contact on the neck – no dings!

- Can be adjusted whilst in position on the neck.

- Great G7th styling.

- Lightweight and low profile.

- Free Lifetime Warranty.

The Capo Company

Nashville capo

For those who prefer the simplicity and speed of a spring capo, the Nashville is the No. 1 choice.

Available for:

6 String guitars

Silver, Black and 18kt Gold Plated

Classical guitars

Silver

- Super lightweight aluminum construction.
- Spring position close to pivot means more leverage, and so less effort to place on the guitar neck.
- Hard, slim string pad means less tuning problems and fantastic clear tone.
- Stores on the peghead or behind the nut.
- Free Lifetime Warranty.

The Capo Company

UltraLight capo

The world's lightest capo – Weights just over 1/4oz!

Available for:

6 String guitars

Black, Red and Blue

Classical guitars

Black

Ukulele guitars

Black

- Slimmest, lowest profile capo available – perfect for beginners.
- Incredible tone due to hard, flexible bar rubber material.
- The world's lightest capo!
Perfect for Classical and Ukulele players who are sensitive to extra weight on the neck.

- Premium capo at low cost: a genuinely pro-level capo at an affordable price.
- Free Lifetime Warranty.

Create a powerful **capo** display

Gain maximum ROI by increasing the impact of G7th on your accessory wall

Multiple facings of G7th capos placed at eye-level has been shown to raise GP on capo sales by an average of 300% in a UK trial
